About

I am a Software Developer with strong expertise in front-end development, specializing in creating intuitive and engaging user interfaces. Passionate about delivering seamless user experiences, I leverage modern frameworks and best practices to build responsive, high-performance web applications. I thrive in collaborative environments, value clean and maintainable code, and continuously explore new technologies to stay ahead in the ever-evolving landscape of web development

Work Experience

Front End Developer Intern | February 2024 - February 2025
PT. Global Digital Niaga (Blibli)

I developed user interfaces for web-based applications using the Vue.js framework, with a strong focus on performance and responsiveness. To ensure component interoperability and overall system stability, I designed and implemented integration tests. I also connected to API endpoints and created local mock APIs to support efficient development and testing processes. Additionally, I contributed to deploying applications to production environments, ensuring smooth feature releases and optimal performance.

Freelance Developer | 2023 - Now
PT. Udio Mind Master

Worked as a freelance developer on several projects for client companies using Next.js and React.js, with a strong focus on UI/UX design and frontend development. Responsible for building responsive user interfaces, integrating APIs, and deploying applications to the cloud using Virtuozzo. Ensured smooth performance and user-friendly experiences across all devices.

Education

Bina Nusantara University
2021 - 2025
Bachelor of Computer Science | GPA 3.91/4.00

Certification

- **Google Data Analytics Specialization, Coursera, 2023**

Languange

- **Indonesia - Fluent**
- **English - Intermediate (conversational and written proficiency)**

Skills

- **Web Development**
- **Cloud Deployment**
- **Integration Testing**
- **Jira**

- **HTML CSS Java**
- **Framework (Vue, NextJS, Expo, Laravel)**
- **React**
- **Bitbucket**

- **React Native**
- **UI/UX - Figma**
- **Git**
